ABB Ltd. Joins CABA Board of Directors

November 16, 2015

The Continental Automated Buildings Association is pleased to announce that ABB Ltd. has joined its Board of Directors.

ABB Ltd. is a leader in power and automation technologies that enable utility, industry, and transport and infrastructure customers to improve their performance while lowering environmental impact. The ABB Group of companies operates in roughly 100 countries and employs about 140,000 people. Camilo Delgado, the Product Marketing Director of ABB's Low voltage wiring accessories (LPWA) business, will represent the firm on the CABA Board.

"The appointment of Mr. Delgado adds further depth and focused experience to the CABA Board of Directors," said Ronald J. Zimmer, CABA President & CEO. "His extensive work as a high-level marketing executive in the automation industry will be of meaningful value as we continue to strengthen our industry positioning and create value for our membership and the industry at large."

Delgado is primarily responsible for developing the go-to-market strategy, develop new sale channels, and strengthen the market position for ABB wiring accessories and home automation products in the United States. He is also a key contributor to market research aimed at providing strategic information to global ABB teams located in China, Germany, and Sweden.

Prior to joining ABB, Delgado held positions in Thomas & Betts where he led the market development and specification position effort and managed profit and loss responsibility in U.S. and Latin America for Industrial lighting, wiring accessories and some medium voltage products. He also held positions with LG Electronics, Decisive Analytics and BZ Sensors.

Delgado has over 10 year of experience in the commercial and industrial (C&I) and utility markets. He holds a Bachelors in Electrical Engineering from University of Florida, a Masters of Electrical Engineering from University of Alabama in Huntsville and is currently pursuing a Masters in General Management from Harvard University Extension School.

"I am happy to join CABA and start contributing to the team," stated Delgado. "The organization is well regarded throughout our industry and throughout the world and I am excited to contribute to its numerous industry initiatives."

About CABA

The Continental Automated Buildings Association (CABA) is a leading industry association that promotes advanced technologies in homes and buildings in North America. More information is available at <http://www.caba.org/>.
