## **INVENSYS ANNOUNCES SPONSORSHIP OF CABA'S INTELLIGENT & INTEGRATED BUILDINGS CONFERENCE**

November 19, 2002

The Continental Automated Buildings Association (CABA) announced today that Invensys, a global leader in the management of production and energy resources, has joined CABA's 2002 Intelligent & Integrated Buildings Conference as an Inner Circle Sponsor.

"We are extremely pleased to lend our support to this world-class event," said Bob Williams, Vice President of Invensys plc. "Sponsorship of this conference is evidence of Invensys' commitment to energy-efficient, cost-saving intelligent building technologies."

The conference will feature numerous industry stakeholders who will discuss and identify key issues facing the large building sector with respect to integrated systems and building automation.

The conference, held in conjunction with the 13th Annual Property Management Expo Show, will examine a myriad of topics including integrated building technologies and the effective marketing of smart building services. The theme of the conference will be "Profiting From The Intelligent Building," and the event will be held at the Metro Toronto Convention Centre on December 2-3, 2002, in Toronto, Canada.

Attendees to the conference will include current members of CABA's Intelligent & Integrated Building Council, which was established in November 2001 to monitor initiatives that relate to integrated systems and automation in the "large building" sector. The Council currently consists of 68 members.

The large building industry at large is invited to join CABA's Intelligent & Integrated Building Council and participate at the Intelligent & Integrated Buildings Conference.

### **About CABA**

The Continental Automated Buildings Association (CABA) is a leading industry association that promotes advanced technologies in homes and buildings in North America. More information is available at [www.caba.org](http://www.caba.org).

### **About Invensys plc**

Invensys plc is a global leader in production technology and energy management. The group helps customers improve their performance and profitability using innovative services and technologies and a deep understanding of their industries and applications.

Invensys Production Management works closely with customers in order to drive up performance of their production assets, maximize their return on investments in production technologies and remove cost and cash from their whole supply chain. The division includes APV, Avantis, Baan, Eurotherm, Foxboro, Simsci/Esscor, Triconex and Wonderware. These businesses address process and batch industries -- including the oil, gas and chemicals, food, beverage and personal health care -- and the discrete and hybrid manufacturing sectors.

Invensys Energy Management works with clients involved in the supply, measurement and consumption of energy and water, to reduce costs and waste and improve the efficiency, reliability and security of power supply. The division includes Energy Management Solutions, Appliance Controls, Climate Controls, Global Services, Metering Systems, Powerware and Home Control Systems. These businesses focus on markets connected with power and energy infrastructure for industrial, commercial and residential buildings.

The company also serves the specialized rail, wind-power and electronic manufacturing (power components) markets through Invensys Rail Systems, Hansen Transmissions and Lambda, respectively, in its development division.

Invensys operates in more than 80 countries, with its headquarters in London. For more information, visit [www.invensys.com](http://www.invensys.com).
