## **CABA NAMES REPRESENTATIVES TO GREEN BUILDING TECHNOLOGY ALLIANCE**

December 19, 2008

CABA, the Continental Automated Buildings Association, is pleased to announce that it has named two representatives to the Green Building Technology Alliance, a new consortium established by BISCO to develop Innovation Technology credits for the LEED green building certification system.

CABA has appointed two Board members: Roy Kolasa, a Honeywell Open Systems Solution Manager and Steve Teubner, Director and General Manager at BAE Systems, to the Alliance.

Kolasa manages the development of open system, integrated solutions for Honeywell's Enterprise Building Integrator (EBI) and ComfortPoint platforms. In addition to recommending how to specify, design, implement and maintain interoperable systems, Kolasa devotes time to educating customers and industry organizations on current technology and the benefits of integrating building automation, fire life-safety, security and access control, digital video, and energy management solutions. Kolasa actively promotes the value of integrated and intelligent building solutions as a member and Past-President of the Kansas City chapter of ASHRAE and as a member representative of BACnet International.

Steve Teubner is responsible for the overall vision, strategy and execution of BAE's intelligent buildings solution offerings, pulling together BAE's extensive experience in information technology, facilities management and complex system integration. Teubner's extensive industry experience covers the entire spectrum of the real estate lifecycle and respective technology solutions within commercial, government and residential real estate sectors.

"We are delighted that highly experienced individuals as Roy Kolasa and Steve Teubner will represent CABA on the Green Building Technology Alliance," stated Ronald J. Zimmer, CABA President & CEO. "Their extensive industrial knowledge coupled with considerable business experience will be of tremendous benefit to the new consortium."

The consortium, which includes InfoComm International and the Telecommunications Industry Association (TIA), has already made comments to the U.S. Green Building Council on the existing LEED system focused on where possible technology credits could be included. The alliance is now focused on writing new LEED Innovation Technology credits, which they began at the International GreenBuild Conference and Expo in Boston on November 18, 2008.

**About CABA**

The Continental Automated Buildings Association (CABA) is a leading industry association that promotes advanced technologies in homes and buildings in North America. More information is available at [www.caba.org](http://www.caba.org).
