CABA TO HOLD RECEPTION IN NEXTGEN HOME AT THE 2009 INTERNATIONAL CES

December 23, 2008

As the official connected home association partner of the NextGen Home Experience, the Continental Automated Buildings Association is pleased to hold a special reception in the NextGen Home at the 2009 International CES.

The reception, sponsored by Direct Energy, will be held from 5:45 to 7:30 p.m. Jan. 9 at the NextGen Home, Booth No. 26062 in the South Hall of the Las Vegas Convention Center.

CABA will be offering refreshments and will announce the release of its 2008 State of the Connected Home market study, published by the organization's Connected Home Research Council. The reception will also announce upcoming CABA research projects for 2009, which will include the user interface, IPTV and home networking research studies.

"CABA is pleased to be able to showcase its connected home research initiatives with NextGen," stated Ronald J. Zimmer, CABA President & CEO. "Showcasing our research in a NextGen venue is fitting since the NextGen Home itself demonstrates the tangible advantages of digital and integrated home technologies."

The NextGen Home Experience, produced by iShow, showcases the latest developments in contemporary living, from advanced home connectivity to storm resistant construction, energy efficiency and "green friendly" lifestyle enhancements.

CABA was named NextGen's official connected home association partner earlier this year in recognition of its strong collaborative market research program. CABA plans to continue to work closely with NextGen in 2009, its 20th anniversary year, to demonstrate the benefits that connected home technologies bring.

About CABA

The Continental Automated Buildings Association (CABA) is a leading industry association that promotes advanced technologies in homes and buildings in North America. More information is available at www.caba.org.
