Southern California Edison Joins CABA Board of Directors

May 11, 2011

The Continental Automated Buildings Association is pleased to announce the addition of Southern California Edison to its Board of Directors.

Southern California Edison, a subsidiary of Edison International, is one of the largest electric utilities in the United States, providing 11 million people with electricity. Alok Singh, Manager, Design & Engineering Services, will represent the company on the CABA Board.

Singh has worked in the field of energy efficiency and sustainable building design since 1994. As a Manager with Southern California Edison's Design & Engineering Services group, he leads a group of technical professionals responsible for providing comprehensive engineering and energy solutions, design expertise, and project and program management services. Singh's responsibilities include providing leadership and oversight to the Statewide Emerging Technologies Program, which is focused on accelerating adoption of commercially available or near market-ready technologies in the marketplace. He is currently involved in a leadership role in numerous Zero Net Energy Demonstration Showcase projects at SCE.

"CABA is extremely gratified to welcome Alok Singh and Southern California Edison to its Board," stated Ronald J. Zimmer, CABA President & CEO. "His vast amount of experience and knowledge will ensure strong representation from a utility noted for its strong support for energy efficient technologies and initiatives."

Singh joined SCE in 2006 as a Senior Energy Efficiency Consultant within the New Construction Services group, where he provided technical and design assistance for the company's first LEED Gold-rated Service Center in Wildomar, California. Prior to joining SCE, Singh was the chief operating officer of a start-up energy services firm in Pittsburgh and worked on a variety of performance contracting and guaranteed saving projects.

Singh received his Bachelor of Architecture from the School of Planning & Architecture, New Delhi, India and is a LEED Accredited Professional, a Certified Energy Manager (CEM) and a Certified Measurement & Verification Professional (CMVP). He also holds an MS degree in Building Performance & Diagnostics from Carnegie Mellon and an MBA from the University of Pittsburgh.

"I am looking forward to working with CABA to contribute to the development and application of technology and automation solutions that will improve the comfort, productivity and efficiency of today's homes and buildings," stated Singh. "CABA contributes an important perspective to our industry, bringing a unique mix of companies, individuals and organizations together to advance the adoption of home and building automation solutions."

CABA has assisted SCE by supporting its “Office of the Future” research initiatives, while SCE is planning to participate in CABA’s State of the Connected Home and Smart Grid’s Impact on Intelligent Buildings research projects.

About CABA

The Continental Automated Buildings Association (CABA) is a leading industry association that promotes advanced technologies in homes and buildings in North America. More information is available at <http://www.caba.org/>.
