CABA and International Society of Automation Sign Memorandum of Understanding

March 14, 2012

The Continental Automated Buildings Association has entered into a memorandum of understanding with the International Society of Automation to promote ISA courses to the CABA membership.

ISA is recognized worldwide as a leader in non-biased, vendor-neutral education and training programs for automation professionals. Industry professionals, whether an experienced engineer, practicing technician, or newcomer to the industry, can hone their skills at ISA's regional training centers, through onsite training programs at their company, or via distance education. Many ISA courses are lab intensive to reinforce important skills.

ISA's extensive instructor-led curriculum is organized in three training paths. Although ISA's certification programs for technicians and automation professionals are not tied directly to ISA's training courses, the training paths are designed to cover the body of knowledge for technicians and automation professionals and can be helpful to those preparing for certification as an ISA Certified Automation Professional (CAP) or ISA Certified Control Systems Technician (CCST).

CABA has committed to promoting ISA courses that address building automation and control systems through the CABA Web site. Links to ISA courses are available for immediate access at: www.caba.org/education-and-training.

"CABA is extremely pleased to enter into this agreement which strengthens its relationship with the International Society of Automation," stated Ronald J. Zimmer, CABA President & CEO. "One of the most important functions of CABA is to educate industry stakeholders and consumers about the advantages of intelligent buildings and the process for creating and maintaining intelligent buildings. We believe our agreement with ISA will lead to a stronger educated workforce."

"ISA is dedicated to working with its partners to enhance the quality of the workforce through its multifaceted education programs," said ISA Executive Director & CEO, Patrick Gouhin. "Our organization is thrilled to work with CABA to establish a list of available ISA education opportunities that will help the labor force in the building automation sector upgrade their skills."

About CABA

The Continental Automated Buildings Association (CABA) is a leading industry association that promotes advanced technologies in homes and buildings in North America. More information is available at <http://www.caba.org/>.
